

Integrating analyses for WHO-GFATM project

Dr Ravi P. Rannan-Eliya

Estimating Expenditure by Disease Training Workshop

WHO, Geneva

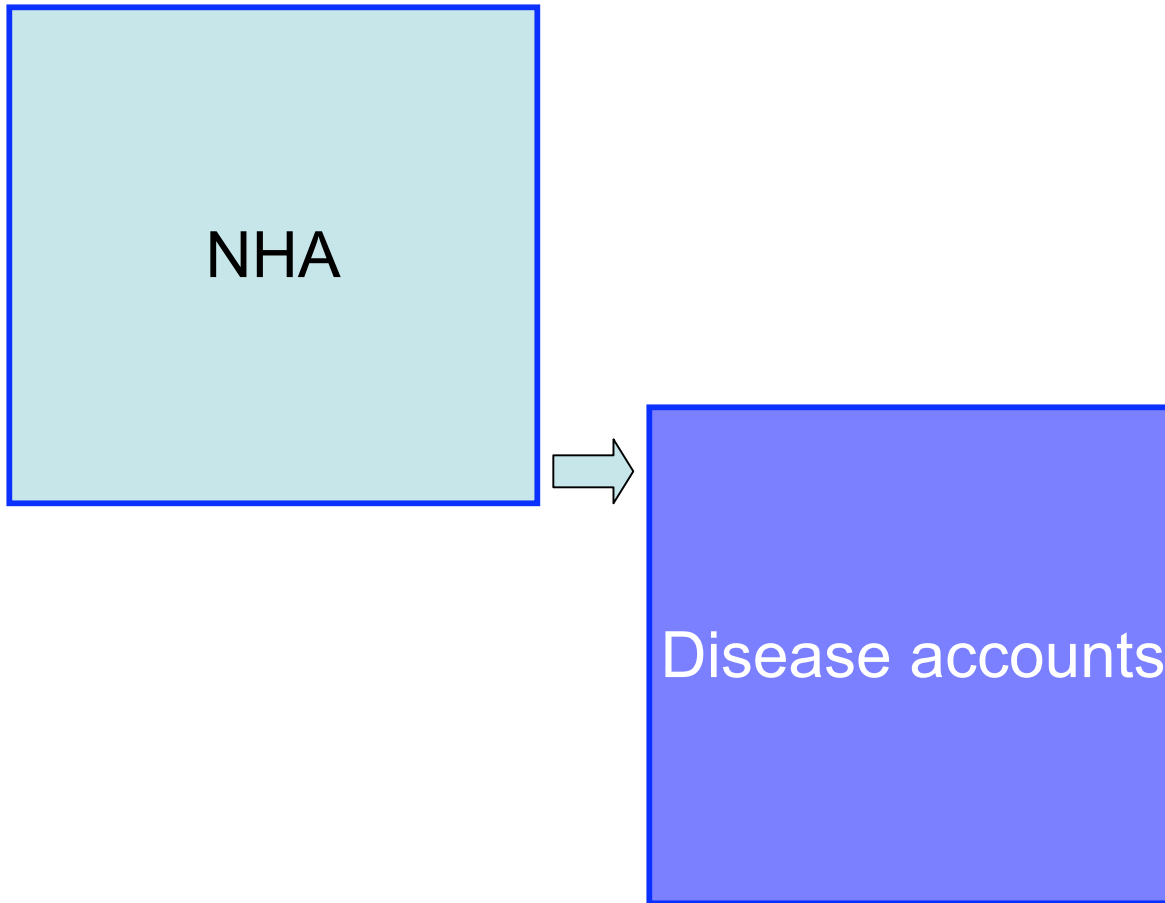

August 20-24, 2007

Target outputs of project

1. Health accounts estimates of total spending in country
2. Reporting tables for GFATM
 - HIV, TB, Malaria, Other spending
3. Disease expenditure distributions
 - All diseases by BOD/ICD categories
4. UNGASS reporting tables

Analytic flow of project components

- Analysis only of personal and targeted program spending
- Break-up spending into major areas and tackle each separately
- May have to collect new primary data

Analytic flow of project components
